

PART 649—AMERICAN LOBSTER FISHERY

Subpart A—General Provisions

Sec.

- 649.1 Purpose and scope.
- 649.2 Definitions.
- 649.3 Relation to other laws.
- 649.4 Vessel permits.
- 649.5 Operator permits.
- 649.6 Dealer permits.
- 649.7 Vessel identification.
- 649.8 Prohibitions.
- 649.9 Facilitation of enforcement.
- 649.10 Penalties.

Subpart B—Management Measures

- 649.20 Harvesting and landing requirements.
- 649.21 Gear identification and marking, escape vent, and ghost panel requirements.
- 649.22 Experimental fishing exemption.
- 649.23 Restricted gear areas.
- 649.24 Exempted waters for Maine State American lobster permits.

Subpart C—Stock Rebuilding Program and Framework Adjustments to Management Measures

- 649.41 Purpose and scope.
- 649.42 Stock rebuilding program requirements and time frame.
- 649.43 First-year framework specifications.
- 649.44 Framework specifications.

Subpart A—General Provisions

§ 649.1 Purpose and scope.

This part implements the Fishery Management Plan for the American Lobster Fishery (FMP), as amended by the New England Fishery Management Council in consultation with the Mid-Atlantic Fishery Management Council and the Atlantic States Marine Fisheries Commission (ASMFC), and approved by the Assistant Administrator for Fisheries, NOAA. Red crab fishing

gear, which is fished deeper than 200 fathoms (365.8 m), is gear not capable of taking lobsters, and is not subject to the provisions of this part.

§ 649.2 Definitions.

In addition to the definitions in the Magnuson Act and in § 620.2 of this chapter, the terms used in this part have the following meanings:

American lobster or *lobster* means the species *Homarus americanus*.

Beam trawl means gear, consisting of a twine bag attached to a beam attached to a towing wire, designed so that the beam does not contact the bottom. The beam is constructed with sinkers or shoes on either side that support the beam above the bottom or any other modification so that the beam does not contact the bottom. The beam trawl is designed to slide along the bottom rather than dredge the bottom.

Berried female means a female American lobster bearing eggs attached to the abdominal appendages.

Carapace length is the straight line measurement from the rear of the eye socket parallel to the center line of the carapace to the posterior edge of the carapace. The carapace is the unsegmented body shell of the American lobster.

Council means the New England Fishery Management Council.

Dealer means any person who receives American lobsters for a commercial purpose from the owner or operator of a vessel issued a valid Federal vessel permit under this part, other than exclusively for transport on land.

Dive vessel means any vessel carrying divers for a per capita fee or a charter fee.

Effort Monitoring Team (EMT) means a group of technical experts made up of representatives from the Council, NMFS, the appropriate states, and a group of American lobster industry representatives (appointed by the Council), per management area, to each EMT.

Escape vent means an opening in a lobster trap designed to allow lobster smaller than the legal minimum size to escape from the trap.
